230,NVN Layout,New Siddhapudur,Coimbatore-44

Aspiring Python backend developer with hands-on experience in building AI-assisted systems using LLMs. Actively seeking opportunities to learn, contribute, and grow in backend and AI integration roles.

Education

BACHELOR OF COMPUTER SCIENCE AND ENGINEERING	2023 – 2027
Sri Shakthi Institute Of Engineering And Technology,Coimbatore,TamilNadu	
CGPA : 8.7*	
HSC	
S.B.O.A Matric & Hr. Sec. School,Coimbatore,TamilNadu	2022 - 2023
Percentage : 81.17%	
SLSC	
S.B.O.A Matric & Hr. Sec. School,Coimbatore,TamilNadu	2020 - 2021
Percentage : 100%	

Skills

Programming Language : Python,SQL
Backend Development &Framework : FastAPI
Frontend Development : HTML, CSS, Javascript (Basic)
Database : PostgreSQL,MySQL
Version Control : Git and Github

Project

AI-Assisted Semantic Form Autofill System

<https://github.com/Rithika-Gurusamy/ai-semantic-form-autofill.git>

Tech Stack: Python, Flask, PaddleOCR, Mistral (Ollama), JavaScript, Chrome Extensions (MV3)

- Built a privacy-first system to extract structured data from government ID documents and semantically autofill web forms.
- Implemented a fully local OCR + Mistral-based LLM pipeline using Ollama, avoiding all cloud APIs.
- Designed semantic field mapping to autofill forms based on intent rather than fixed HTML layouts.
- Developed a Chrome extension (Manifest V3) for real-time, user-controlled form autofill.

Academia : College Academic Assistant System

<https://github.com/Rithika-Gurusamy/Academia.git>, <https://academia-five-dun.vercel.app/>

Tech Stack: Python, FastAPI, PostgreSQL, HTML, CSS, JavaScript

- Designed and developed a role-based academic management system supporting separate workflows for students and faculty using FastAPI and PostgreSQL.
- Implemented secure authentication with hashed passwords, email-based account recovery (OTP), and backend-enforced role authorization.
- Built a faculty dashboard with advanced multi-criteria filtering (register number range, gender, scholar type, community, scholarships, reservations) to dynamically view student records.
- Architected the system to be scalable and extensible, enabling future modules such as reminders, document storage.

Internship

Vault of Codes (July 2025 – August 2025)

Python Programming Intern

- Completed hands-on Python programming projects and assignments as part of an internship, applying core programming concepts in real-world scenarios.
- Practiced Object-Oriented Programming (OOP) principles including classes, inheritance, polymorphism, and encapsulation through structured project tasks.
- Developed small applications using Python modules and logical problem-solving techniques to demonstrate understanding of programming fundamentals.

Certifications

- The Git & Github Bootcamp: Master From Basics To Advanced
<https://www.udemy.com/certificate/UC-87d50973-cbc1-48ff-a112-09696e4ff38b/>
